

SUPSI

Research, Innovation & Mobility

Prof. Giambattista Ravano

Deputy Director Research and Innovation

SUPSI-Manno

Agenda

- Innovation ?
- Is mobility an Innovation driver?
- Why Switzerland is a strong contributor to Innovation
- Some Swiss Italian real projects and the next few year

Innovation ?

Innovation ?

An innovation is something new that fulfils a specific social benefits. This definition includes both goods and services as well as processes and structures in the economy and in other areas of society.

Is mobility an innovation driver?

Societal Challenges and Innovation (EU objectives)

- Health, demographic change and wellbeing;
- Food security, sustainable agriculture and forestry, marine and maritime and inland water research, and the Bio economy;
- Secure, clean and efficient energy;
- Smart, green and integrated transport;
- Climate action, environment, resource efficiency and raw materials;
- A changing world - inclusive, innovative and reflective societies;
- Secure societies - protecting freedom and security of society and its citizens.

The Challenge

Health, demographic change and wellbeing

Project

Robot walker for elderly people in public spaces

The Challenge

Food security, sustainable agriculture and forestry, marine and maritime and inland water research, and the Bio economy

Project

Dynamics and interactions in food systems (from providers of farm inputs to consumers)

Evaluate transportation food paths, assess the notion of “food miles” to reduce GHG emission.

The Challenge

Secure, clean and efficient energy

Project

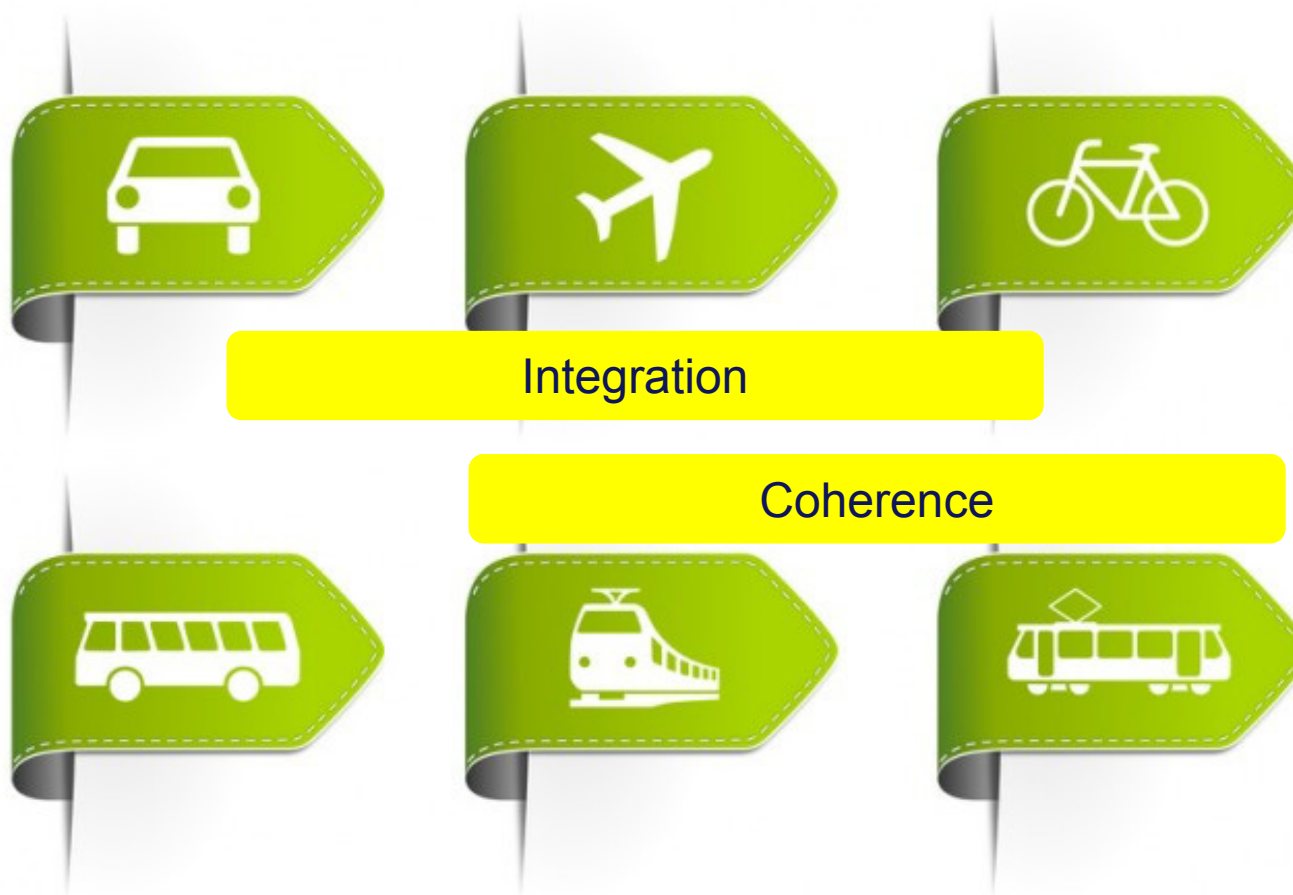

Hydrogen Mobility

Large-scale market test of hydrogen refuelling infrastructure, passenger and commercial fuel cell electric vehicles.

The Challenge

Smart, green and integrated transport

Project

Congestion Reduction in Europe : Advancing Transport Efficiency

Rigorously and systematically develop practical definitions of urban road congestion and of network performance, and identify factors influencing conditions in different cities.

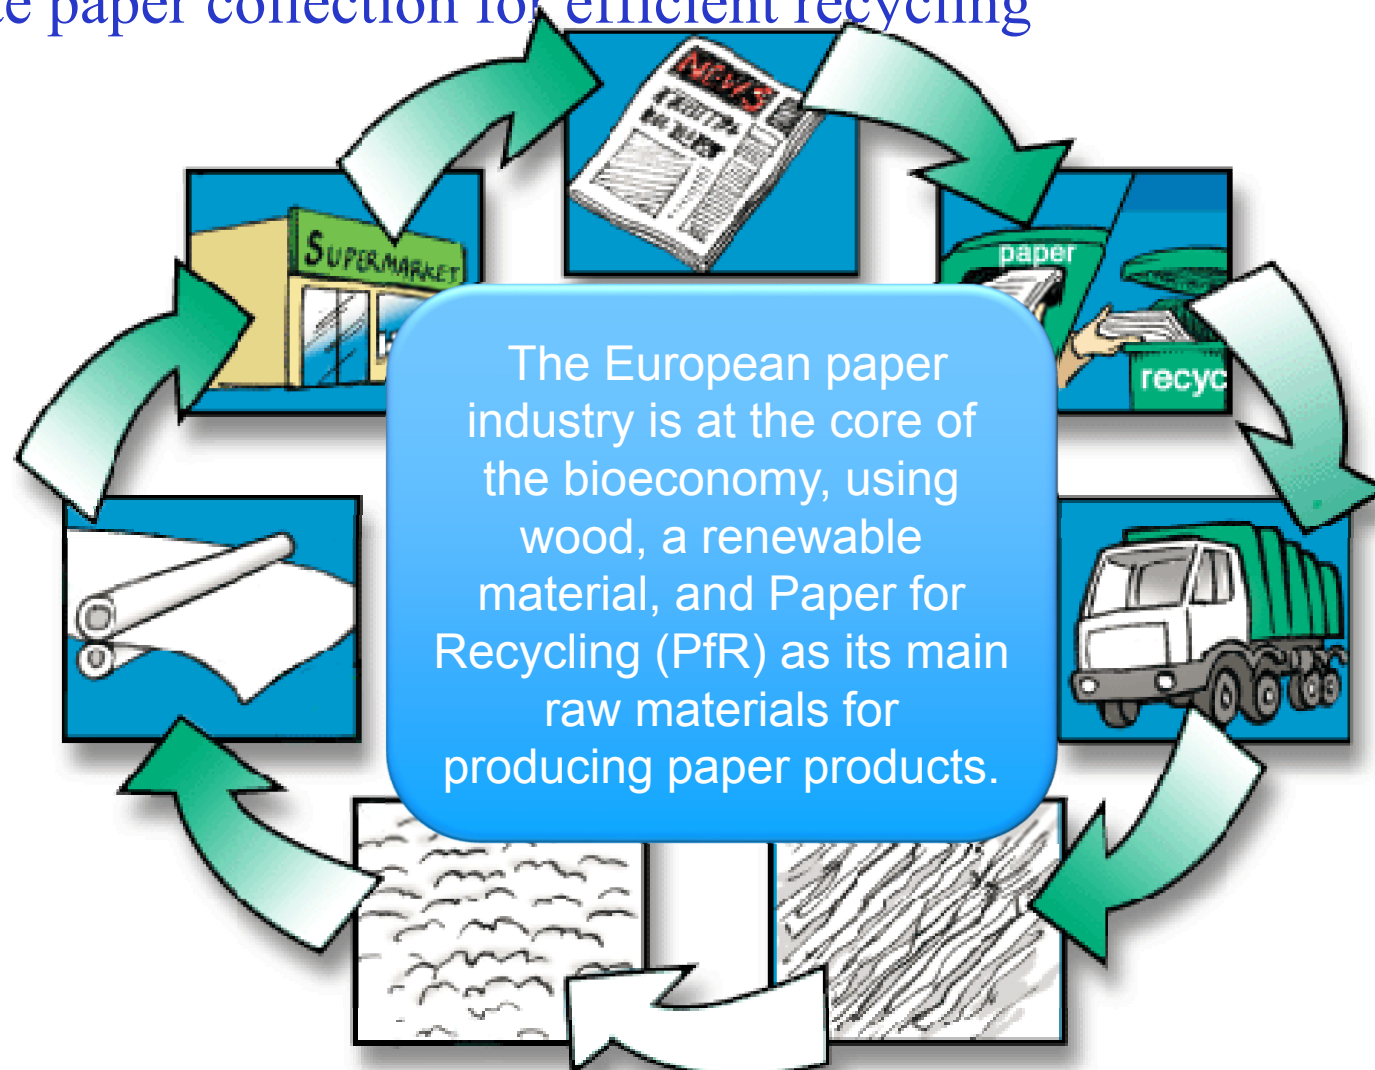

The Challenge

Climate action, environment, resource efficiency and raw materials

Project

Separate paper collection for efficient recycling

The Challenge

A changing world - inclusive, innovative and reflective societies

Project

Encouraging Lifelong Learning for an Inclusive and Vibrant Europe

Erasmus+

ERASMUS+

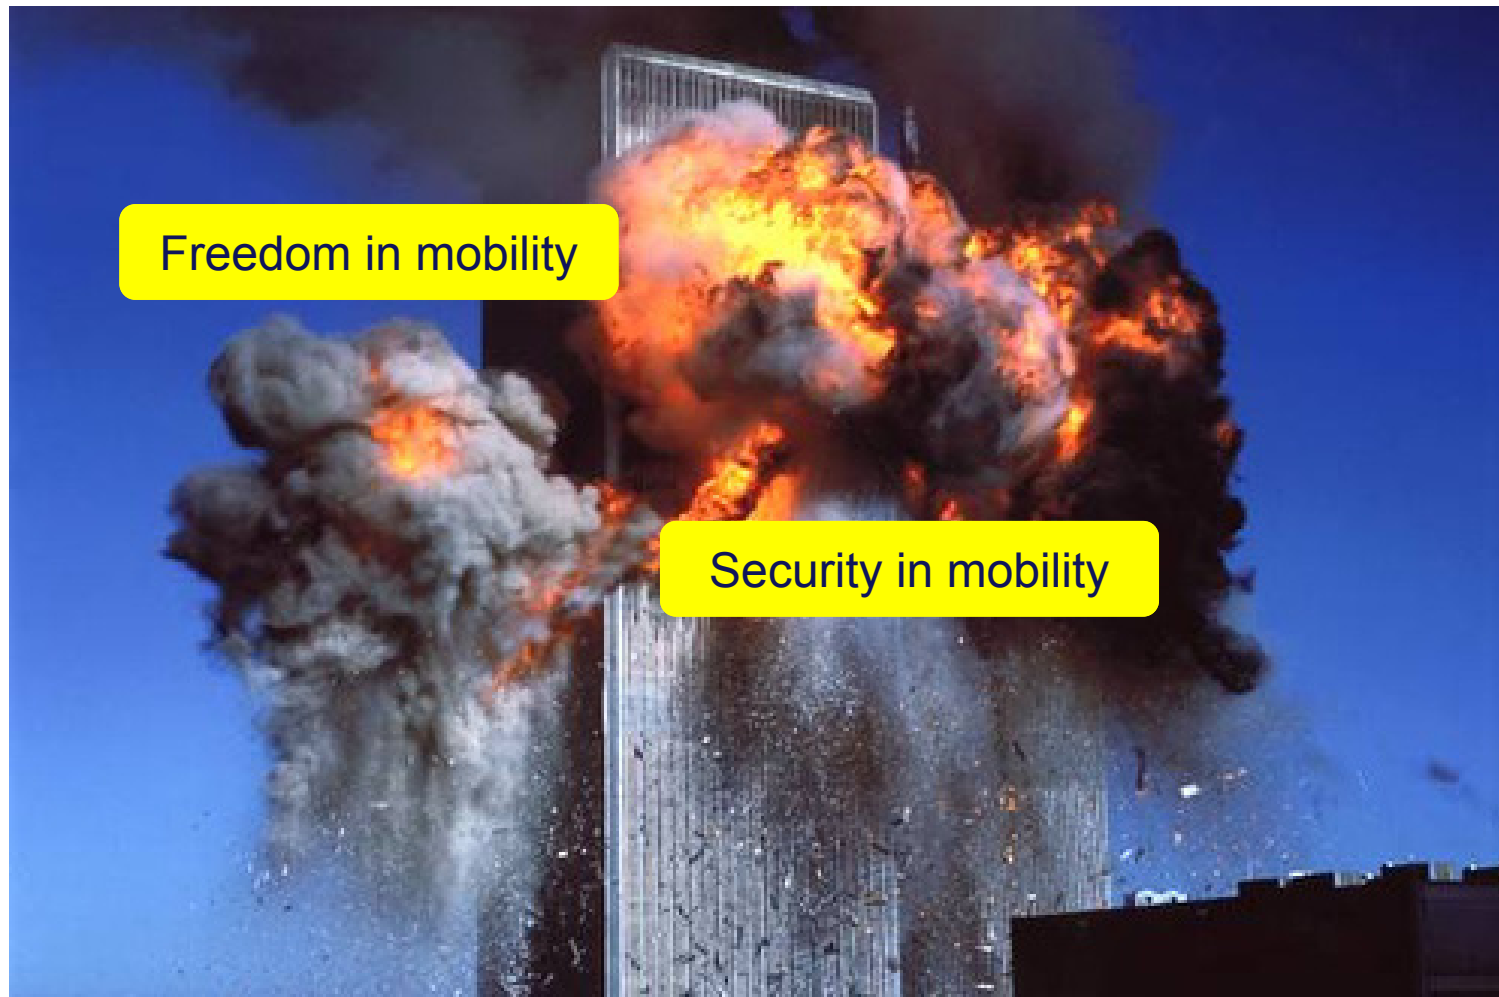

EUROS

Enhance the provision and take-up of learning opportunities for adults, leading to a more productive and innovative workforce, and reduced social exclusion

The Challenge

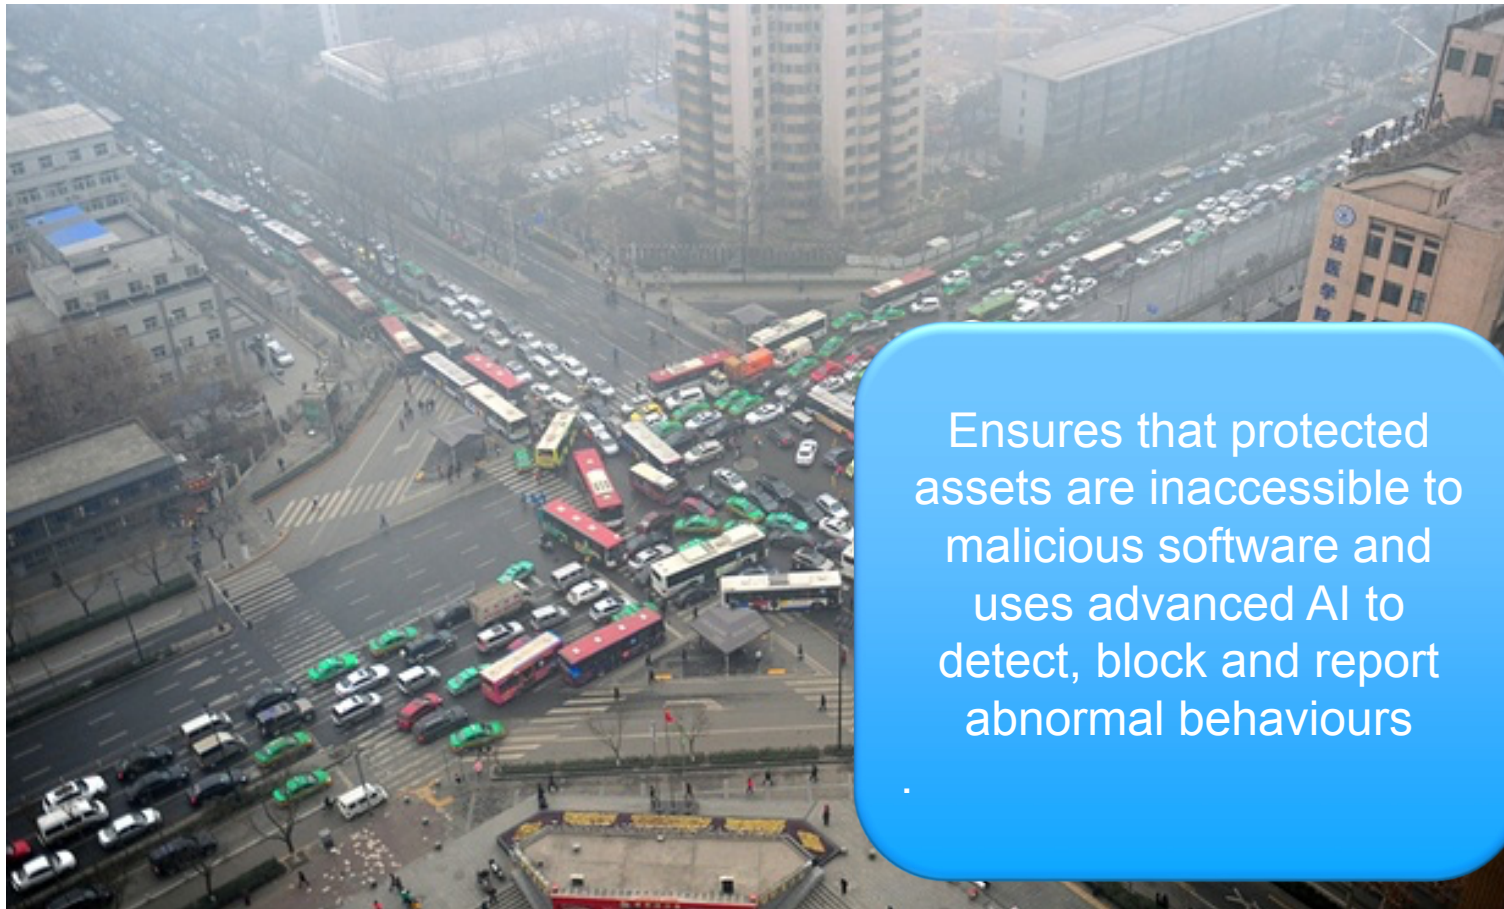

Protecting freedom and security of society and its citizens

19/10/2016

Project

Critical urban infrastructure and soft target cyber attack protection

Ensures that protected assets are inaccessible to malicious software and uses advanced AI to detect, block and report abnormal behaviours

Why Switzerland is a strong contributor to Innovation

Innovation Indexes (The Global Innovation Index)

- Political stability and safety
-
- Expenditure on education
- QS University ranking
-
- ICT access
- Environmental participation
-
- Ease of getting credits
- Venture capital deals
-
- University Industry research
- Patents by origin

•

Policy

Education

Technology

Finance

Research

Switzerland nr. 1

- Political environment
- Government effectiveness
- R&D Companies and Universities
- Market capitalization
- Knowledge workers
- Patents

Research

Policy

Education

Switzerland and Innovation

- small country: **high degree of decentralisation**, short distances, geographical proximity, smooth-running formal and informal networks
- **diversity in the branches** and the size structure of businesses: a good mix of large global companies and a large number of SMEs with a high tendency to innovate
- highly flexible labour market, different ways to education, skills & grade mix, **low youth unemployment** and **good work discipline**
- high level of **international economic integration** in education and science, free movement of persons within the EU
- high **political stability**: moderate but continuing reforms; high ability to integrate various cultures

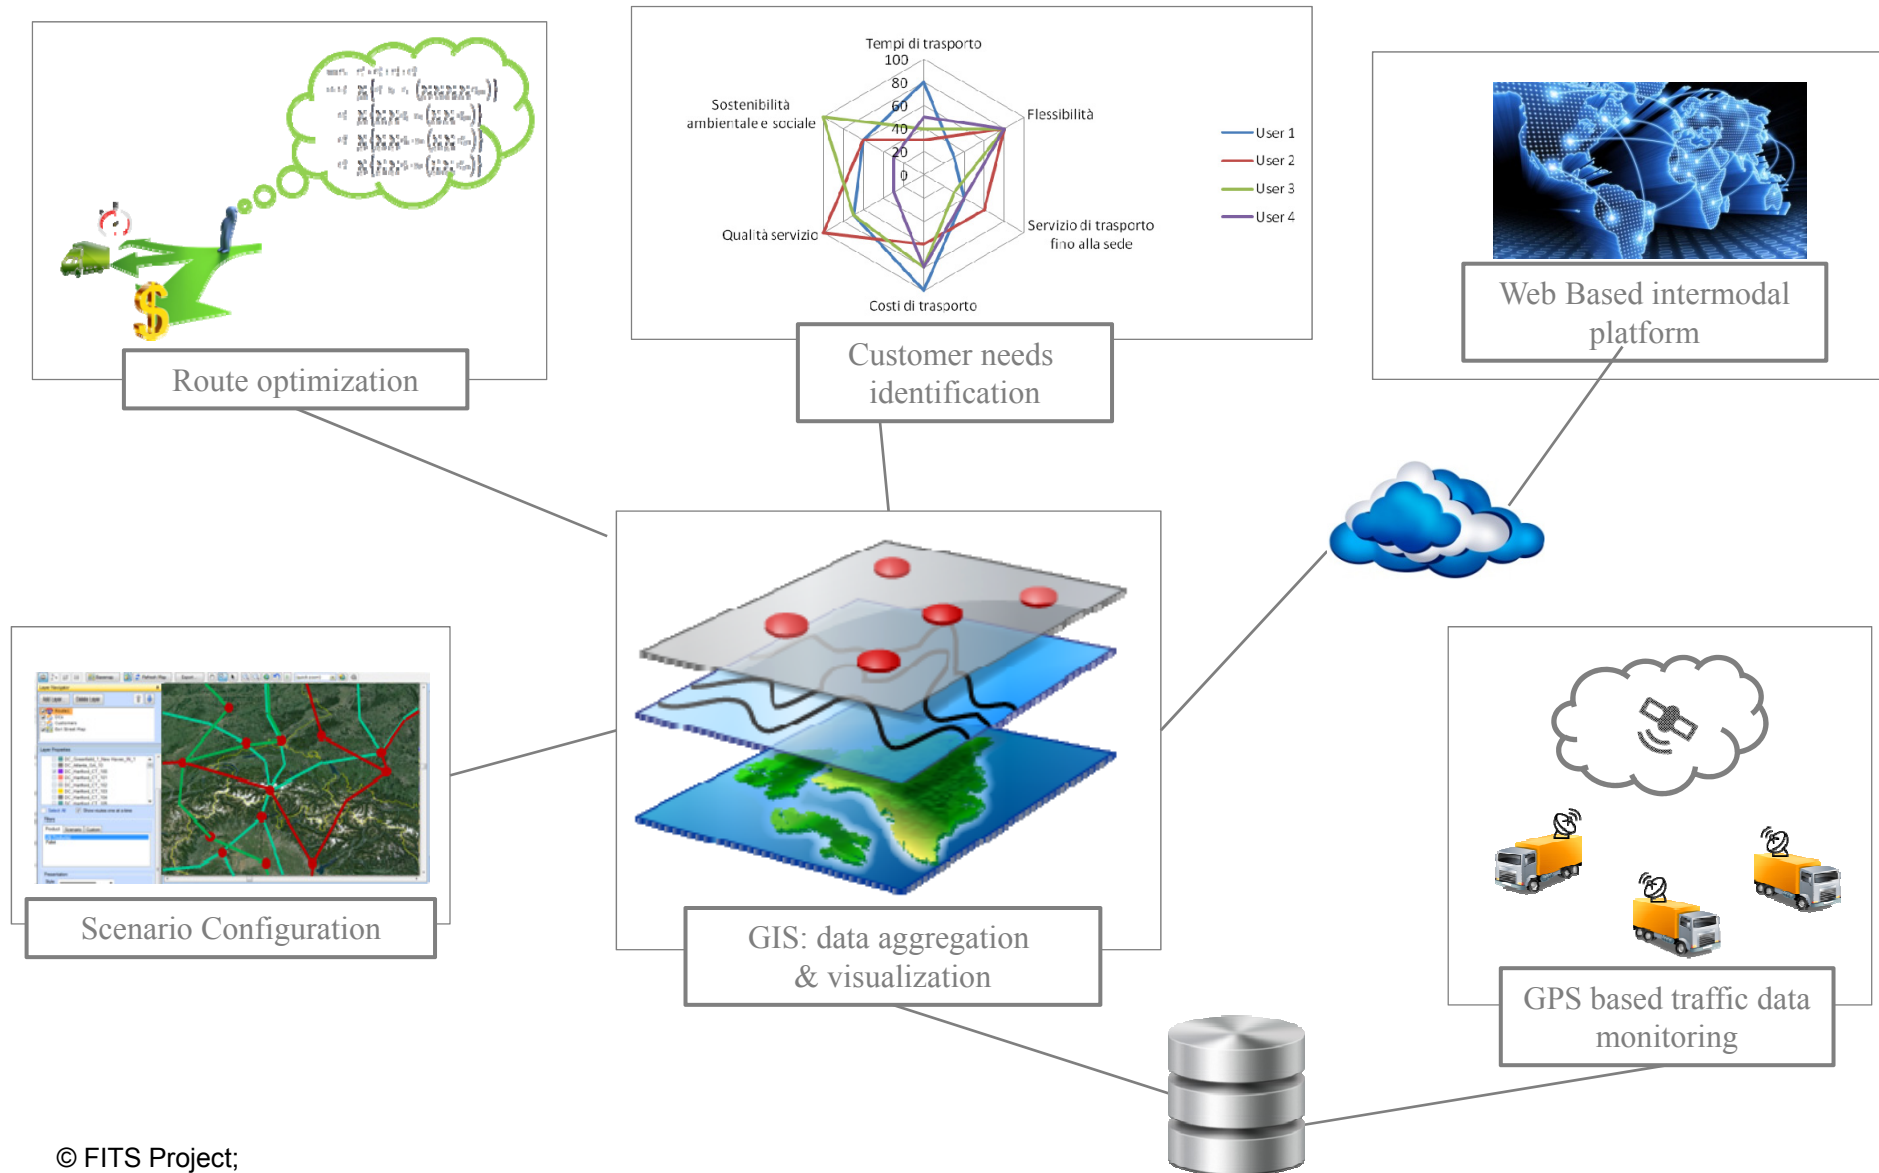

Some Swiss Italian real projects in the next few year

Flexible Intermodal Transport System

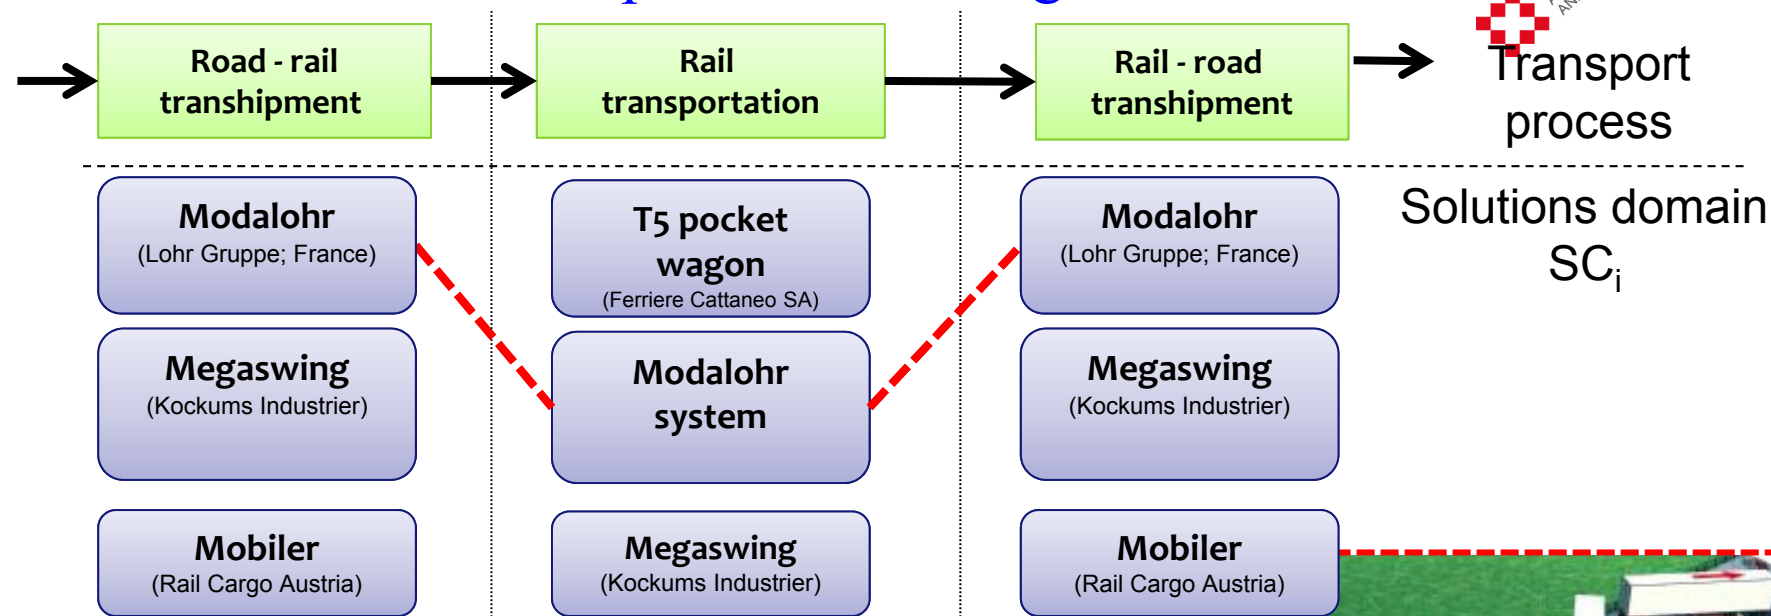

Prof. L. Canetta SUPSI

GIS based Intermodal Framework Decision Support System (IFDSS)

Scenario definition and parameter setting

Vehicles configuration

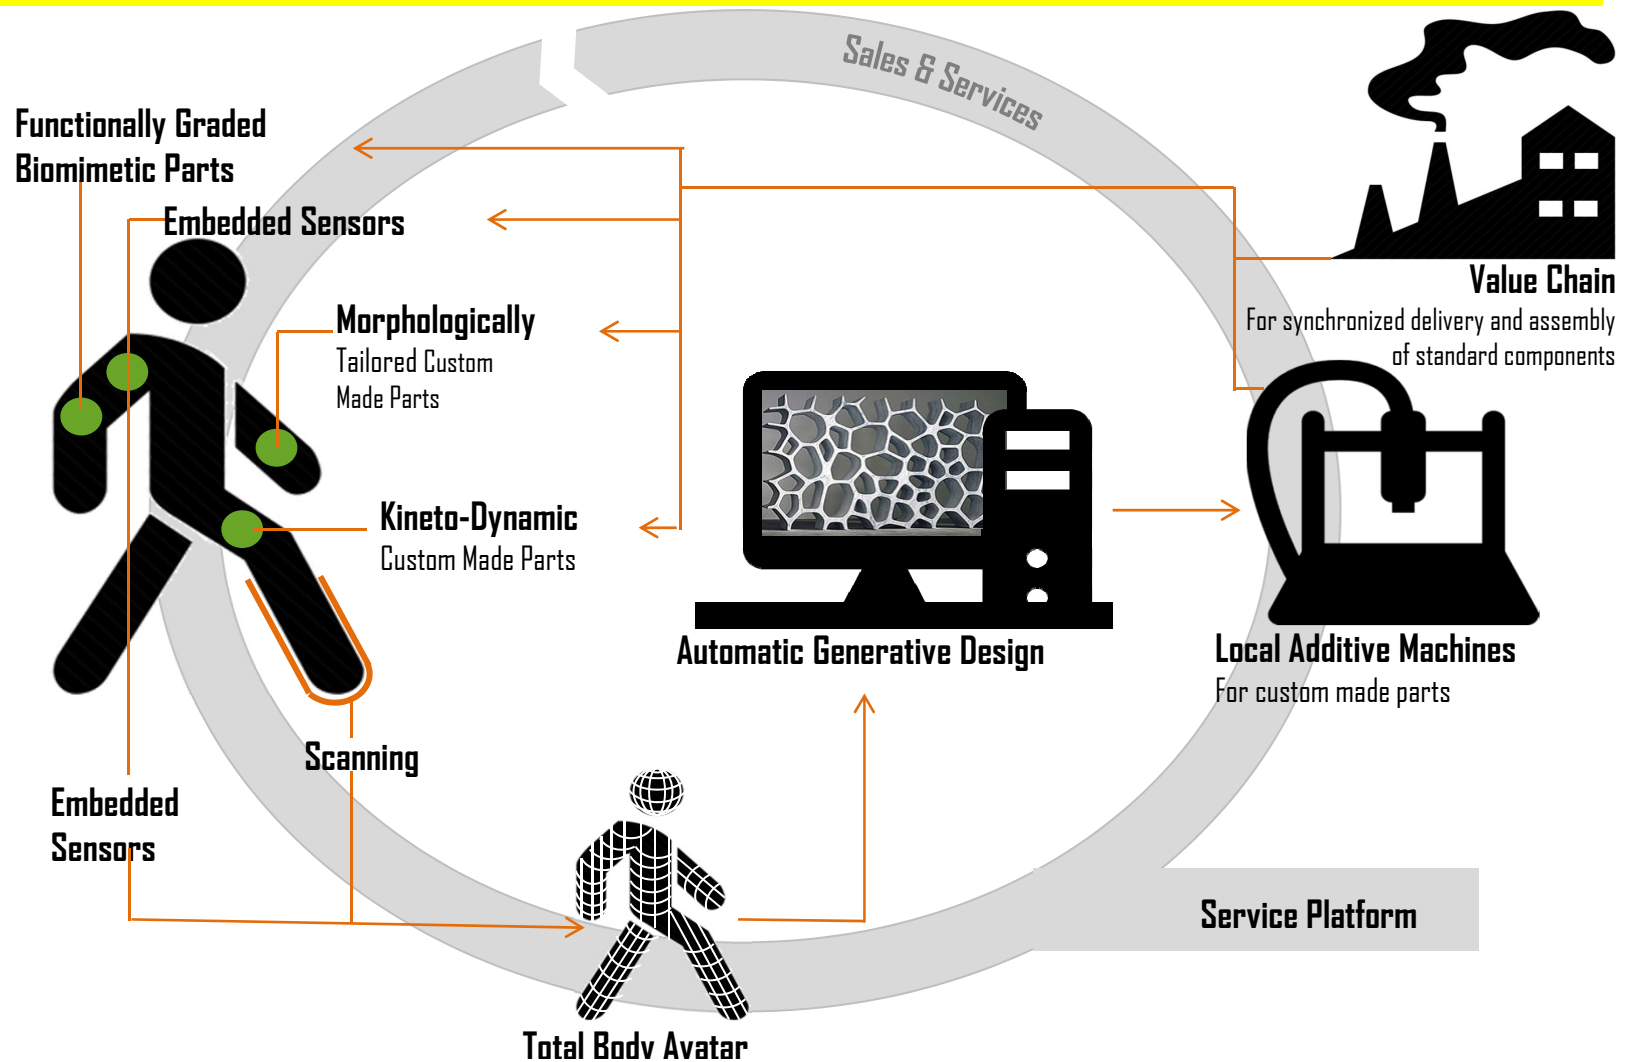

Truck	Locomotive	Railcar	Train composition
Truck			
String			
road train			
Articulated truck-EURO 5			
Name:	road train	Length (m)	18.25
Width (m)	2.5	Height (m)	4
HR (n°)	1	Salary (CHF/y)	80000
oil energy (l/h)	48	Electric energy (KWh)	0
CO ₂ (g/Km)	1020	SO ₂ (g/Km)	356
NO _x (g/Km)	2.7	PM ₁₀ (g/km)	0.02
Noise (dB)	38	Max speed (Km/h)	120
Min speed (Km/h)	15	Mean speed (Km/h)	83
Max load weight (KN)	400000	Min load weight (KN)	180000
Mean load weight (KN)	395000	Initial investment (CHF)	500000
Life time (Km)	400000	Maintenance (CHF/y)	35000
Disposal cost (CHF)	1234	Non direct cost (CHF)	123

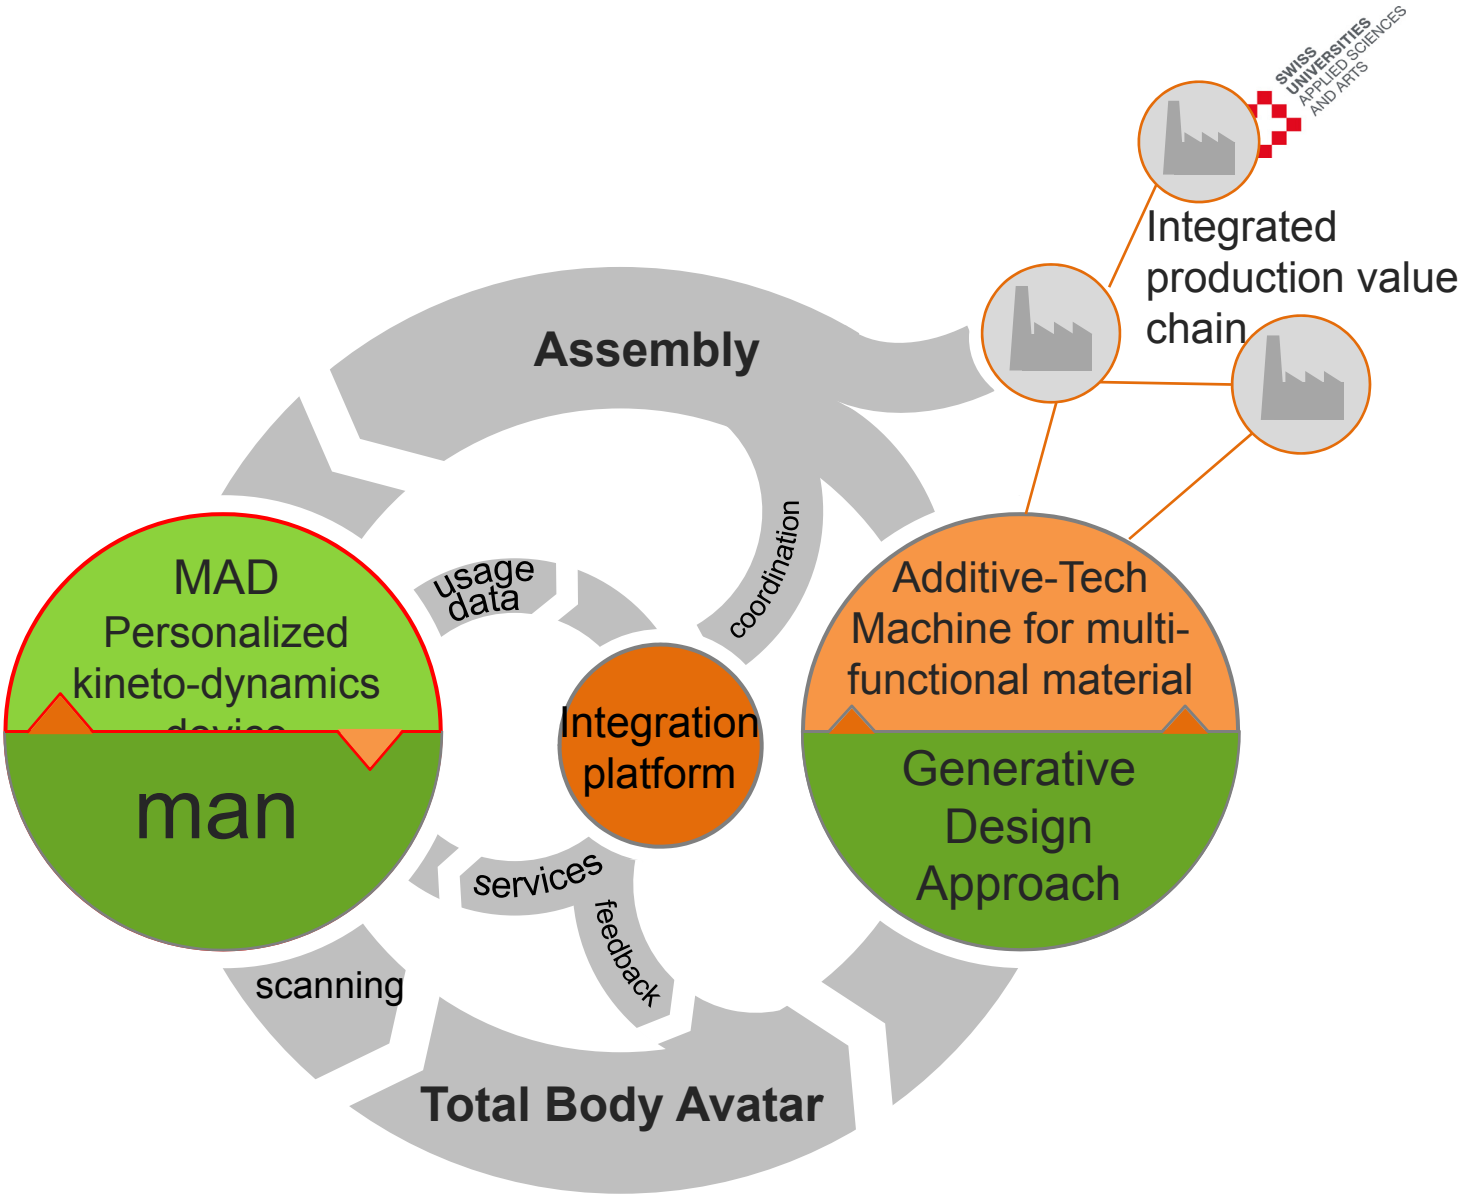

Resource configuration: quantitative parameters estimated for scenario description and assessment

H2020 MovAiD

Prof. P. Pedrazzoli SUPSI

SUPSI

Worker with activities which entail severe risk injury and low job productivity

Disabled children with uncontrolled motion or arthrogryposis

Elderly with deambulation problems to reduce fall probabilities and injuries

Innovative Thinking Is Fostering Sustainable Mobility

Thank you for your attention
